Dear Valued Customer:

Effective January 2006, White Hydraulics, Inc. will be changing the CE motor shaft seal to a new improved design. Extensive qualification testing has been conducted on the new seal and the new seal shows significant improved performance over the old design. The new seal is completely interchangeable with the old design and can be used to service both new and existing motors.

The new shaft seal part number is 400018000 and replaces the old seal component numbers 500018138, 500018175, and 500018176. Please note the improved seal is an integrated one-piece design. Seal kit numbers are revised as follows:

Old Kit #	New Kit #
400444200	400444200B (CE 400 Series Seal Kit)
400444300	400444300B (CE 410 / 420 Seal Kit)

Please note, only the shaft seal is affected by this change. The new seal is 100% field interchangeable for CE motors. Associated CE housing kits will be upgraded as a running change and part numbers will remain unchanged.

White Hydraulics, Inc. is initiating a product improvement to the product line listed below. This change will affect the form, fit or function of the product, as described below. We value your input and concerns regarding any change to our product line.

Products Affected: CE Motor Shaft Seal and Seal Kits

Description: Improved CE shaft seal

If you have any questions regarding these changes, please contact the White Hydraulics, Inc. Technical Support Group at 800-323-7298.

Notification (Reply within five (five) working days only if this change presents a problem with your application)

Customer Approval Requested (Response Required Within Five (5) Working Days)

Will this change adversely affect your application? _____ No _____ Yes
If so, please describe: _____

COMPANY NAME: _____

CUSTOMER SIGNATURE: _____

TITLE: _____

DATE: _____

PHONE: _____

If "Notification" is checked above, respond only if this change will adversely impact your product application. If "Customer Approval Requested" is checked, please complete and return this form via fax to our product engineering group at (270) 887-0390. Thank you for your cooperation.

Thank You,

Director of Marketing
