Date: December 12, 2006  
To: Our Customers & Authorized Distributors  
Subject: Standard Paint Color

Dear Valued Customers:

White Drive Products has initiated a process change with our paint vendor to improve the appearance, quality and adhesion of our paint coatings. We are now using a urethane-based paint instead of alkaline. This improvement provides 10% greater toughness and over twice the corrosion resistance. As part of this change, we are also implementing a change to our standard color. Effective immediately, the standard paint color for White Drive Products will be satin black instead of metallic grey. The 'A' and 'B' paint code options listed in our product nomenclature will be adjusted to reflect the change to satin black. Shipments from stock will be provided in metallic grey until existing stocks are depleted.

We are pleased to provide you with this better product at no additional charge.

Finally, at this time of year, we would like to thank you for your support during 2006, and we look forward to continuing our relationship and helping you prosper in 2007.

Very truly yours,

Gregory J. Moreland  
Director of Marketing  
White Drive Products, Inc.
